Minsk, Belarus · Remote / hybrid / on-site · open to relocation

4+ years of commercial experience. I build B2B admin applications and customer portals with React / Next.js and TypeScript. My focus is modular frontend architecture, shared UI libraries, and reliable interfaces. I also develop NestJS backend services and LLM integrations.

WORK EXPERIENCE

CityOS

April 2024 — present

Frontend Developer

Property management platform with an admin application, resident portal, and shared backend. Products for CityOS, North Waterfront, Nuanu, and SunBridge.

Modular platform & admin application

- Designed the frontend platform from scratch: **30+ domain modules** in separate repositories, **git submodules and pnpm workspaces**. FSD and architectural linting enforce boundaries; modules are reused across products for four clients.
- Built modules for resident requests, residents, staff, communications, and access control. Implemented **real-time chats with Centrifugo / WebSocket**: history, assignments, unread messages, and permissions.
- Maintain the **shared UI library**: forms, tables, filters, pagination, and cached reference data. Integrated Quill, media uploads, and HTML sanitization; handled time zones and data validation.
- Established quality checks with **Jest / Testing Library, Storybook / Chromatic**, strict TypeScript, linters, and Husky. Addressed stale-chunk failures after deployment by retaining recent builds and reloading the application once.

North Waterfront · resident portal

- Built the portal with **Next.js 16 / React 19**: FSD, SSR, SEO, server-side ru/en localization, authentication, news, a knowledge base, and parcel lockers.
- Implemented camera viewing (**hls.js, RTSP / go2rtc**), intercoms, and remote access-point opening. Added HLS proxy validation to mitigate SSRF; configured Docker Compose for web and go2rtc.

Backend & integrations · 2026

- Contributed to the **NestJS API gateway, chatbot, and notification service**: proxying, DTO validation, file uploads, JWT, and service-to-service authentication using guards.
- Worked with **PostgreSQL / TypeORM**: migrations, transactions, and idempotent callbacks; wrote integration and end-to-end tests with **Jest / Supertest**.

Infrastructure & processes: composition repository, Docker Compose, GitHub Actions, dev / SIT / prod. Define API contracts with the Laravel team; configure project rules for Claude Code and OpenCode.

Stanislau Melnik Senior Frontend Developer

EXPERIENCE, PROJECTS & SKILLS

EdWin

May — July 2026

Frontend Developer · contract

- Built the frontend of an AI analytics service from scratch: **React 19, strict TypeScript, Vite, FSD**. Figma design tokens, SCSS / CSS Modules, and UI components in Storybook.
- Implemented chat, sessions, personas, and tasks. **TanStack Query v5**: optimistic updates, invalidation, AbortSignal, and error recovery. React Router v7, authentication, and i18next.
- Set up **OpenAPI codegen**, Sentry, Vitest / Testing Library, and CI: type checks, linting, tests, application and Storybook builds. Docker containerization.

ComDev.group

April 2022 — December 2023

Frontend Developer

- Developed a **React / Redux Toolkit** application with MUI, Formik / Yup, react-hook-form, i18next, and Mapbox. Migrated the service from **iSSR to Next.js** and introduced FSD.
- Integrated **Self-Sovereign Identity** and verifiable credentials using owlmeans.

PERSONAL PROJECTS

LLM Integrator

April 2026 — present

Full-stack · LLM bot for Twitch

- **NestJS 11, TypeORM, PostgreSQL, Twitch Helix API.** LLM responses, error handling, echo-response protection, and request cost tracking; Jest / Supertest / Testcontainers tests.
- **React 19 / Vite / Ant Design:** bot settings, spend charts, and error logs. Composition repository: server, client, admin, OBS extension; Docker, Nginx, and GitHub Actions.

Twitch bot · March 2026. Next.js 16 prototype: Twitch OAuth, Telegram / Telegraf, message deduplication; migrated from Prisma to TypeORM.

Wuthering Waves Championship · October 2024. Next.js 14, FSD, JWT, Telegram Login, user account, and localization.

CORE SKILLS

Frontend	TypeScript · React · Next.js · React Router · Redux Toolkit · TanStack Query
UI & data	Ant Design · MUI · Sass / CSS Modules · Tailwind · Formik · react-hook-form · Zod · Yup · Axios · i18next
Backend	Node.js · NestJS · Express · REST / OpenAPI · PostgreSQL · TypeORM · JWT / OAuth
Quality	Jest · Vitest · Testing Library · Supertest · Testcontainers · Storybook · Chromatic
Tools	Docker · GitHub Actions · Sentry · Vite / Webpack · Git · pnpm · Claude Code / OpenCode

EDUCATION

Belarusian State Technological University, Minsk — incomplete degree.
PixelPlex — “Node.js: Theory and Practice”, 2022.

LANGUAGES

Belarusian — native · Russian — C2
Ukrainian — C1 · English — B1
