Stanislau Melnik

Senior Frontend Developer

React / Next.js / TypeScript

stanislavmelnik@gmail.com +375 (44) 733-66-60 GitHub / StanislavMelnik1991

Minsk, Belarus · Remote / hybrid / on-site · open to relocation

Frontend engineer with **4+ years of professional experience** in React, Next.js, and TypeScript. Designed a **frontend platform with 30+ modules** for CityOS, North Waterfront, and SunBridge applications. Focused on B2B interfaces, shared UI and real-time features; also delivered commercial LLM / OpenRouter and Telegram integrations.

WORK EXPERIENCE

CityOS

April 2024 — present

Frontend Developer

Property management platform. Client deployments: CityOS, North Waterfront, Nuanu, and SunBridge.

Modular platform & admin application

- **Designed the frontend architecture from scratch.** Client applications are assembled from shared modules in separate repositories. Linting enforces FSD boundaries; git submodules and workspace packages integrate modules for parallel development.
- Maintain the **shared UI library**: components, forms, and API contracts. Implemented filters and reference-data caching; handled time zones and permissions in forms. Integrated Quill and media uploads with HTML sanitization.
- Built **real-time resident chats with Centrifugo / WebSocket**: history, assignments, unread counters, and permissions. Developed modules for resident requests, residents, staff, communications, and access control.
- Set up **Jest / Testing Library, Storybook / Chromatic**, strict TypeScript, linting, and Sentry. Integrated the legacy API; added recovery from stale-chunk errors by retaining the last three builds and reloading the application once.

North Waterfront & CityOS · resident portals · 2026

- Built the **North Waterfront portal with Next.js 16 / React 19**: SSR, SEO, server-side ru/en localization, authentication, and parcel lockers. Developed the CityOS version based on it.
- For North Waterfront, implemented camera streaming (**hls.js, RTSP / go2rtc**), intercoms, and remote door unlocking. Added SSRF protection for the HLS proxy; configured Docker Compose for web and go2rtc.

Backend & integrations · 2026

- Built an **OpenRouter LLM service and a Telegram adapter with Telegraf**; extracted chat business logic from the API gateway into a separate microservice.
- API gateway and chatbot: **NestJS**. Separated user JWT authentication from service-to-service access. **PostgreSQL / TypeORM**: migrations, transactions, idempotent callbacks; backend integration and end-to-end tests with Jest / Supertest.

Collaboration & delivery: define API contracts and implementation plans with the Laravel team; maintain the backlog. Created and maintain North Waterfront and CityOS integration repositories; Docker Compose, GitHub Actions.

Stanislau Melnik Senior Frontend Developer

EXPERIENCE, PROJECTS & SKILLS

EdWin

May — July 2026

Frontend Developer · project contract

- Built the frontend of an AI analytics service from scratch: **React 19, TypeScript, Vite, FSD**. Created a design system using Figma tokens and UI components in Storybook.
- Implemented chat, sessions, personas, and tasks. **TanStack Query v5**: optimistic updates, cache invalidation, request cancellation, and error recovery. Project-scoped routing, authentication, and i18next.
- Set up **OpenAPI codegen**, Sentry, Vitest / Testing Library, and CI: type checks, linting, tests, application and Storybook builds. Docker containerization.

ComDev.group

April 2022 — December 2023

Frontend Developer

- Developed a **React / Redux Toolkit** application with MUI, forms, localization, and Mapbox. Migrated the service from **iSSR to Next.js** and introduced FSD.
- Integrated **Self-Sovereign Identity** and verifiable credentials using owlmeans.

PERSONAL PROJECT

LLM Integrator

March 2026 — present

Full-stack · LLM bot for Twitch

- **React 19 / Vite / Ant Design / Recharts:** bot settings, LLM spend charts, error logs, and user management. Docker, Nginx, and GitHub Actions.
- **NestJS, TypeORM, PostgreSQL, Twitch Helix API:** LLM responses, error handling, and request cost tracking. Jest / Supertest / Testcontainers tests.
- March: Next.js prototype with Twitch OAuth, a Telegram bot, and message deduplication. Since April: a platform with a separate backend, client, and admin application.

CORE SKILLS

Frontend	TypeScript · JavaScript · React · Next.js · App Router / SSR · React Router
Data	TanStack Query · Redux Toolkit · Formik · react-hook-form · Yup · REST / OpenAPI
UI & styling	HTML / CSS · Sass / CSS Modules · Tailwind · Ant Design · MUI · Figma · i18next
Backend	Node.js · NestJS · Express · PostgreSQL · TypeORM · JWT / OAuth
Integrations	LLM APIs / OpenRouter · Telegram / Telegraf · WebSocket · HLS / go2rtc
Testing	Jest · Vitest · Testing Library · Storybook · Chromatic; backend: Supertest / Testcontainers
Delivery	Docker · GitHub Actions · Sentry · Vite / Webpack · Git · pnpm

EDUCATION

Belarusian State Technological University, Minsk — undergraduate studies; degree not completed. **PixelPlex** — “Node.js: Theory and Practice”, 2022.

LANGUAGES

Belarusian — native · Russian — C2
Ukrainian — C1 · English — B1
